

For Your consideration

Name : Edgar Bosco Monis
IT - 34 /16

Demonstrable skills :

I know about marketing myself ,content creation and I'm not afraid to put myself out there - I have my own blog. <http://thenormalangle.blogspot.com/>

I have created a website for the college IEI club and could create something of the same caliber really quickly. I take pride in my coding skills and ability to rapidly prototype.

The IEI website : <https://eddiebarry.github.io/>

However my true strength lies in public speaking, I once gave an impromptu presentation on world entrepreneurship day without prior practise/rehearsal, with just a bare idea of the topics I wanted to cover that day.

With preparation I've won the Speech as well as the debate competition held on Constitution day (26th November 2018)

I know video editing and have access to the tools required to create short films masterfully. I have attended a film making workshop in Mumbai and know cinematographic techniques like blocking, lens usage, lighting and editing.

I'm a tech savvy student and know my way around computers and electronics . So any issues with sound, stage management, lighting and projectors I can work towards fixing.

The above mentioned skills I have demonstrated in the past, however I'm adaptable and willing to work in multiple roles, however best my skills may be used for the overall success of the event.

Regards
Edgar Monis.
